

The Aniston

A mirrored image of its sister floor plan, The Aniston offers the same thoughtful and efficient design as The Berkley. The ranch home boasts a two car attached garage, mud room corridor, and laundry room. An expansive kitchen with stainless appliances sits opposite the first floor master with his-and-her closets. Two sizeable guest rooms offer the ability to convert to office space. Private baths plus powder room for guests. Tasteful finishes with wood-look flooring and professionally selected tile throughout.

Don't forget the gas fireplace to warm the home during Ohio winters with evergreens covered in snow outside the rear window wall. Or, take advantage of the fenced-in patio for tea, a book, and a little summer sun.
